

Mid-term assessment protocol
Minutes of the meeting of the mid-term assessment Committee

The mid-term assessment was carried out on the basis of:

- doctoral student's report,
- opinion of the supervisor / supervisors / assistant supervisor,
- an oral or multimedia presentation by a doctoral student,
- discussions with the doctoral student.

The implementation of the doctoral student's individual research plan was assessed remotely via the "Zoom.us" platform. The course of the public part of the mid-term assessment Committee meeting was recorded on video.

Assessed PhD student

professional title, name and surname of the doctoral student	Karolina Anuszkiewicz, MD
supervisor/supervisors	Jerzy Jankau, MD, PhD, DSc
assistant supervisor	Kamil Drucis, MD, PhD
scientific discipline	Medical sciences
the title of the doctoral dissertation project	Indocyanine green (ICG) preclinical symptoms of lymphedema in patients after mastectomy

Mid-term assessment Committee comments:

Based on the documentation, which includes doctoral student's report, as well as opinion of the supervisor, Jerzy Jankau, MD, PhD, DSc and the assistant supervisor, Kamil Drucis, MD, PhD, along with the presentation made by the doctoral student and subsequent discussion, the Commission has issued a positive mid-term evaluation result.

Mid-term assessment result of doctoral student Karolina Anuszkiewicz, MD: positive / ~~negative~~ *

Name and surname of the doctoral student

* check appropriate

Detailed justification by the mid-term assessment Committee regarding the result of the mid-term evaluation:

The doctoral thesis focuses on exploring the potential of lymphography using indocyanine green (ICG) for identification of patients with greater risk of developing lymphedema. According to the Committee's assessment, the execution of the research plan has been progressing smoothly. Based on the Doctoral Student's presentation and the report, the Committee has determined that the Doctoral Student has made adequate progress in doctoral work. Furthermore, the Doctoral Student was able to effectively address all questions and comments posed by the Committee Members

during the evaluation process. The plan for the next stages of the project does not raise any serious concerns, and no factors dependent on the PhD student have been identified that could negatively affect their implementation. The publication plan also seems reasonable and achievable. Careful attention to the study design, particularly regarding sample size, should be taken to ensure the validity and applicability of the findings. Since the target group has been changed, the title should be modified accordingly in the formal procedure.

The mid-term assessment Committee composed of:

- 1) prof. dr hab. Anna Żaczek – Chairperson of the mid-term assessment Committee
- 2) prof. dr hab. Franciszek Burdan
- 3) prof. dr hab. Michał Pikuła
