

Mid-term assessment protocol
Minutes of the meeting of the mid-term assessment Committee

The mid-term assessment was carried out on the basis of:

- doctoral student's report,
- opinion of the supervisor / supervisors / assistant supervisor,
- an oral or multimedia presentation by a doctoral student,
- discussions with the doctoral student.

The implementation of the doctoral student's individual research plan was assessed remotely via the "Zoom.us" platform. The course of the public part of the mid-term assessment Committee meeting was recorded on video.

Assessed PhD student

| assistant supervisor | - |
| scientific discipline | Health Sciences |
| the title of the doctoral dissertation project | Clinimetric properties of protocol for the assessment of right hemispheric dysfunctions for use in clinical practice and research. |

Mid-term assessment Committee comments:

The title of the doctoral dissertation project of PhD student Agnieszka Skrzypkowska is "Clinimetric properties of protocol for the assessment of right hemispheric dysfunctions for use in clinical practice and research"

The aim of the project is to create a protocol assessing deficits related to right hemisphere lesions that can be used along with NIHSS. The doctoral student conducts the validation and evaluation of clinical usefulness of each subtest in acute phase of stroke and comparison of right hemispheric stroke volumes in CT along with their NIHSS scores adjusted with scores from protocol with left hemispheric stroke volumes.

The doctoral student conducts research within the set deadline.

Mid-term assessment result of doctoral student Agnieszka Skrzypkowska: positive / negative *

Detailed justification by the mid-term assessment Committee regarding the result of the mid-term evaluation:

PhD student Agnieszka Skrzypkowska reported the problem of employment at UCK, and thus the recruitment of patients, but this problem was positively resolved.

The tasks completed so far are fully aligned with the objectives outlined in the IPB. The PhD student correctly approaches the analysis and interpretation of results (validation tests), which contributes to the theoretical and practical foundations of the research she conducts.

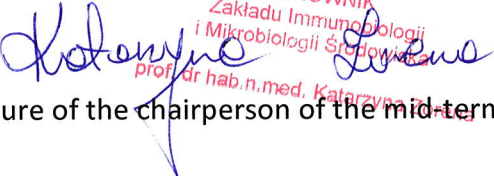

PhD student Agnieszka Skrzypkowska has clearly defined plans for the further implementation of the IPB, which include completing the final empirical studies and publishing the results.

The doctoral student answered the questions asked during the mid-term evaluation. The committee determined that, based on the progress made so far, PhD student Agnieszka Skrzypkowska should complete her research on time and prepare her doctoral dissertation according to the schedule. The Committee noted that the postponement of the implementation of tasks was becoming increasingly evident, and drew attention to the acceleration of work related to the implementation of the research topic.

The mid-term assessment Committee composed of:

- 1) prof. dr hab. Katarzyna Zorena—Chairperson of the mid-term assessment Committee
- 2) prof. dr hab. Małgorzata Szczuko
- 3) prof. dr hab. Mariusz Siemiński

The mid-term assessment was carried out on 23/09/2024
