

Mid-term evaluation protocol

Of the PhD student at the First Doctoral School of the Medical University of Gdańsk

The mid-term evaluation was carried out on the basis of:

- doctoral student's report (Annex 1 to the protocol),
- opinion of the supervisor / supervisors (Annex 2 to the protocol),
- a multimedia presentation of a doctoral student,
- discussions with the doctoral student.

The implementation of the doctoral student's individual research plan was assessed remotely via the "Zoom.us" platform.

Assessed PhD student

professional title, name and surname of the doctoral student	Wiktoria Stańkowska
supervisor/supervisors	Jan Dumański
assistant supervisor	
scientific discipline	Pharmacy
the title of the doctoral dissertation project	Comprehensive analysis of somatic, post-zygotic mutations in prostate and colorectal tumours and the uninvolved margins in male cancers

Presentation prepared by a doctoral student on the implementation of an individual research plan, methods and ways of implementation, the results of research to date, along with a discussion.

Committee comments:

...The committee is impressed by the high value of the research projects and a very informative way it was presented. Following the presentation, Wiktoria Stańkowska was asked for details of their experiments and the statistical design; she elegantly evidenced full understanding of goals, technical difficulties and limitations of the research project.

Detailed justification by the Commission regarding the result of the mid-term evaluation (record based on the verbal assessment of the Commission in the form of a recording):

The main goal of Wiktoria Stańkowska's project is comprehensive analysis of somatic mutations in prostate and colorectal cancer with particular emphasis on a tissue forming microenvironment surrounding the tumor. The research hypothesis is well defined and scientifically important, the studies are very well designed and the PhD student is aware of possible limitations. Experiments and analyses performed so far pose as a good basis for reaching the goals of the project that can be described in research articles as well as completing the PhD course in a due time.
