

Mid-term evaluation result of doctoral student **Fionä Caratis, M.Sc:** **positive / ~~negative~~***
Name and surname of the doctoral student * check appropriate

Detailed justification by the Commission regarding the result of the mid-term evaluation:

The Committee unanimously voted for the positive mid-term evaluation of the Ph.D. project by Fionä Caratis. The main criteria of evaluation, i.e. progress of experimental/scientific work according to the individual research plan did not bring any doubts when analyzing the report prepared by the Candidate and listening to the presentation of obtained results. The general impression was that the presentation was heavily packed with data, which made a substantial contribution to the project. Importantly, Ms. Caratis accurately answered the questions asked by Committee members and was perceived as a knowledgeable person dealing with the appropriate research techniques. Finally, studying the supervisor's and assistant supervisor's written positive opinions strengthened the Committee's impression that the project is on the right track and that Ph.D. Candidate's engagement and skills predict the successful conclusion of the research plan with either dissertation or publications in decent scientific journals.

The mid-term evaluation committee composed of:

- 1) Dr. Habil. Marcin Okrój, Assoc. Prof. – Chairman of the mid-term evaluation committee
- 2) Prof. Mirosław Andrusiewicz, Ph.D.
- 3) Prof. Maciej Jankowski, M.D., Ph.D.

The mid-term evaluation was carried out on 26th April 2023
